

Receiver Adaptor B-EHEK

The receiver adaptor B-EHEK is qualified for any camera with V-Mount battery system (Sony BP-L, IDX Endura) that misses an audio receiver slot-in. With cameras changed from NP to V-Mount battery system this is mostly the case.

The receiver adaptor is clicked to the camera like a battery. The output of the receiver is directly connected to the audio input of the camera with the provided connecting cable.

in the front

behind

EHEK with Audio Receiver Sennheiser 3041

On the backside the receiver adaptor provides the universal V-Mount attachment system to fix the battery directly.

The battery supplies both the receiver and the camera with power.

With no additional tool or connecting cable necessary the mount of the receiver to the adaptor is a very convenient and economical solution.

Working with an audio mixer changed to V-Mount battery system the B-EHEK offers a solution to provide the Sennheiser Receiver EK3041 with power supply. This way you may add up to 4 receiver adapter to a 4 channel mixer by using a single power supply.

- for all broadcast camcorder with V-Mount battery system
- especially designed for use with the Audio Receiver Sennheiser EK-3041
- Power supply via camera battery
