

KROMA TELECOM

BELTPACK BP6000

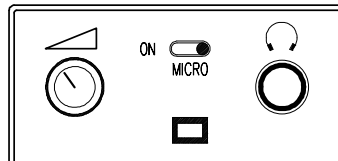

The communication from and to the beltpacks takes place through the matrix. This allows the beltpacks in the system to communicate with every station or with only one.

It can be connected directly to the Analogue Matrix, to the Aux Input of any User Panel, thru Concentrator or A/D Converter.

Pictures below show the rugged beltpack. This unit has been designed for continuous use. It is compact and versatile. Practical operating features include a volume control, headset jack, mute key and I/O connector.

| PIN | 7 FEMALE DIN CONNECTOR |
|-----|------------------------|
