

Glidecam Camcrane 200 System

The Camcrane 200 is a tripod mounted, boom-arm, camera crane system designed to allow you to smoothly boom your camera up, boom your camera down and move your camera in an infinite number of 360 degree arcs.

When balanced and used correctly the Camcrane 200 moves with such tremendous precision and fluidity, that the result can only be called “picture perfect”.

For cameras weighing up to 11,25 Kg.
