

GLIDECAM GOLD SERIES ARM

The Glidecam Gold Arm TM incorporates sophisticated engineering and precision machining to make it lightweight and strong.

Six Titanium springs allow the Gold Arm to handle a camera load of 6 to 17 Kg. Its combined camera and sled carrying capacity ranges from 14 to 25 Kg.

Unique to the Gold Arm are its Hyper-Extension TM Hinges, which allows the arm more freedom of movement. For added strength and durability our vest connectors are made of Titanium. The arm to vest socket pin connector is also made of Titanium.

With the purchase of a Glidecam Gold Arm we include a Lifetime Replacement Warranty on the original set of Titanium springs.
