

Grizzly-3

Unique Features

Dual-Use Aluminum Buckle

The shoulder strap attaches to the case via this rugged yet lightweight buckle, which accepts either a quick-release hook or the strap itself. Either option ensures that the strap will cross the shoulder at the optimal angle for comfort and stability.

Insertrolley compatible

Allows you to use the trolley separately or with several cases by sliding the trolley through the sleeve. You can detach the trolley if you want to store it and replace it if damaged. 4 extendable wheels for better stabilization.

Interlocking and Inverted Interlocking Handles

Kata's patented handles have been designed and field-tested for sure grip and optimal comfort. For heavier and wider bags, the left side of the handle locks to the right side of the handle for added security.

OMEGA - Hidden Backpack System

Many cases come with a carrying system concealment unit, which gives you rapid access to the harness and waist belt and allows easy re-packing when needed.

Modi-Vers System compatible

This System allows you to create compartments that meet your requirements. The divider can be cut with scissors to any desired size. You can attach the newly cut divider to another divider or the walls of the bag with a special Velcro connector.

EPH (Ergonomic Photo System) compatible

A modular system that allows you to set the required configuration by attaching 1-3 KATA cases together.

Toblerone

Made from synthetic thermo-rubber, this uniquely designed feature absorbs shocks and protects the case from abrasion, dirt, mud and standing water.

Insertrolley compatible

Allows you to use the trolley separately or with several cases by sliding the trolley through the sleeve. You can detach the trolley if you want to store it and replace it if damaged. 4 extendable wheels for better stabilization.
