

## **HD-CC-3**

### **Unique Features**

#### **Dual-Use Aluminium Buckle**

The shoulder strap attaches to the case via this rugged yet lightweight buckle, which accepts either a quick-release hook or the strap itself. Either option ensures that the strap will cross the shoulder at the optimal angle for comfort and stability.

#### **Interlocking and Inverted Interlocking Handles**

Kata's patented handles have been designed and field-tested for sure grip and optimal comfort. For heavier and wider bags, the left side of the handle locks to the right side of the handle for added security.

#### **APSS Advanced Padded Shoulder Strap**

On one shoulder or across the chest, the patented APSS Strap has a unique curved shape that prevents it from digging into the wearer's neck while offering optimal weight distribution.

#### **Modi-Vers System compatible**

This System allows you to create compartments that meet your requirements. The divider can be cut with scissors to any desired size. You can attach the newly cut divider to another divider or the walls of the bag with a special Velcro connector.
