

KROMA TELECOM

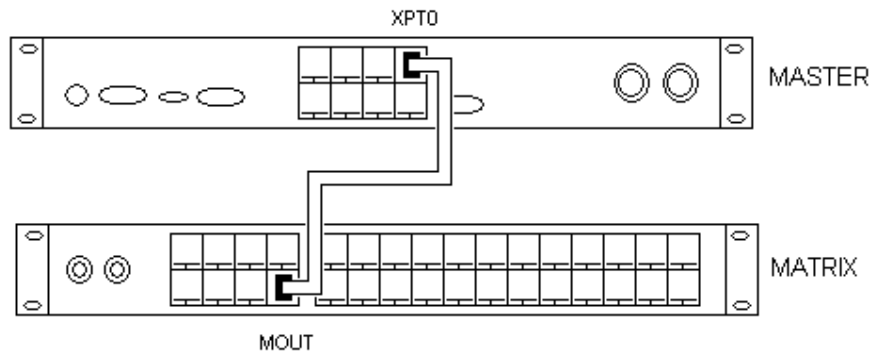

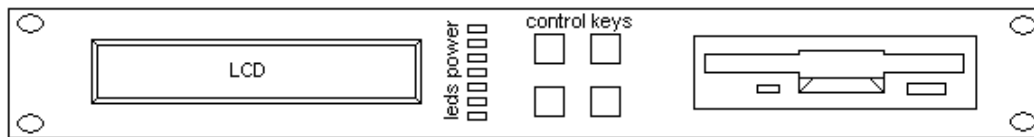

TM7000 – DIGITAL INTERCOM MATRIX Plus MASTER UNIT

In only one unit high, 32 matrix ports are available for TP7000 user panels, TR7000 interface boards and TW7000 wireless beltacks to be connected:

TM7000 Matrix

Matrix is controlled and synchronized from the Master unit, which can handle up to 128 ports:

Kroma provides the master-matrix connection, which is done thru twisted 8-wire FTP CAT 5 with RJ45 connectors. System is totally escalable. Interconnection of 32 matrixes is done in ring mode. See its LCD below:

Its RAM keeps the active crosspoint map while its ROM has the saved 8 maps. Once edited by Indico config programme, they can be loaded thru floppy disk or a serial connection to a PC. New crosspoints can be created in real time, acting online on the active map.
