

# Tripod LL 100w

The main characteristics of this up to 220 lbs loadable, patented crane tripod are compact measurements, and easy handling.

The TRIPOD LL 100w brings your camera crane in heights, which are usually only reached by big cranes. Cause of the possibility of increasing the height from 5,8 ft ( 1,8m) up to 9 ft. (2,8 m) you may operate the crane on a small area and you will get over barriers (audience, fences, bushes, ramps) without building a special construction first.

The TRIPOD LL 100w is equipped with roles which can be changed to talons by reversing them.

Cause of the decoupling of the balance weight it also reduces the oscillation of the crane at fast movements. If you use the TRIPOD LL 100w on a crane without adjustable balance weight you have in addition the advantage of weight adjustment to find optimal balance of your crane.

## Main features:

- Loadable up to 220 lbs. (100 kg)
- Easy and fast set up within two minute and no need of tools
- Compact transport dimensions length 4,2 ft. (1,3 m), circumference 9,8 inch (25cm), weight 26,5 lbs (12 kg)
- Innovative decoupling balance weight holder
- Adjustable height every 4 inch (10 cm)
- Multi-compatible mounting for cranes
- One-man controllable
- Water-level control for exact adjustment
- High quality parts made from air craft industry materials in CNC-technic, air craft tube

Technical data:	Tripod LL 100w
Heights:	min 5,7 feet ( 1,8 m), max 9 feet (2,8 m)
Possible other heights:	6, 1 ft. (1,9 m), 6, 5 ft. (2 m), 6,7 ft. (2,1 m), 7 ft. (2,2 m),7,4 ft. (2,3 m), 7,7 ft. (2,4 m), 8 ft. (2,5 m), 8,4 ft. (2,6 m),8,7 ft. (2,7 m), 9 ft. (2,8 m)
packing dimensions:	4,2 ft. (1,3 m), circumference 9,8 inch (25cm)
weight:	26,5 lbs (12 kg)
Loadable up to:	220 lbs. (100 kg)

PROFESSIONAL MEDIA PRODUCTS

## Example:

You have a cane and need to make shots under the sun-blind covered garden terrace, over the forecourt up to the 2nd floor of the house. Unfortunately there is a hedge in your way. That means usually you need to build a ramp.

Not with the TRIPOD LL 100w! Place the TRIPOD LL 100w, mount your crane and camera and adjust the heights you need. Now mount the balance weight and you can start to film. Even if there are cars, fences, people or other objects in your way, you can easily get over those barriers with the TRPOD LL 100w.

On any even, hard ground you may roll the TRIPOD LL 100w easily.

Have you also recognized, that you can lift your camera now up to 7,4 feet ( 2 m) higher as it used to be??
