

"If we had known then what we know now, our purchasing decision would have gone with TerraBlock from the start – we are completely sold on its virtues."

Dave Warner - Crawford Communications

The 24EX Model is another example of Facilis' commitment to our customers and their satisfaction. Replacing the previous 12D 3u chassis, the 24EX allows capacity expansion without the added expense of an additional server.

The 24EX with only 12 drives is capable of all the same high-bandwidth performance that our many 12D customers have enjoyed since 2004. the 24EX is expandable at any time to the capacity of a full 24D, up to 24TB.

- Play Streams
 - 20 at Compressed SD Video
 - 8 at Uncompressed SD Video
 - 2 at 1080p 10bit HD
